Christmas Buying Begins Early and Shopkeepers Are Gratified With Prospects.

REAL ESTATE IS MOVING

GENERAL TONE OF MARKET UP TO STANDARD.

merchants report Christmas trade of the week excellent, and the demand for money is greater than during the previous week. Bank clearings with the exception of one day have been coniderably ahead of the corresponding peiod of last year, and the aggregate volame of business transacted is estimated argely in excess of the same week of last ear. Transactions on the floor of the ocal stock exchange were large, on a enerally healthy market. While there some disposition toward selling as a means of providing Christmas money, his is, if anything, less than usual, and he prospects for the future were perhaps never better.

Mining in all its branches is in a highly prosperous condition, and more money is finding its way into investments of this character than ever before in the history of the city. In this line, too, the outlook is excellent.

### Real Estate Still Active.

The week has been a busy one in real estate circles, and some valuable pieces of property have changed hands. While a week ago the preference seemed to lie with property in the southern part of the city, this week the demand has been general all over the city. Applications for cottages and four and five-room houses are still coming in at a good rate, and there is an excellent market for property of this character. Rentals of houses of a similar character are also in good demand, notwithstanding the number of houses being finished and put on the market by contractors and builders. Tenements and apartment houses are still eagerly sought after, but the demand is not as heavy as it was a few weeks ago.

### Building Trades Busy.

Building operations continue in various building operations continue in various parts of the town with unabated activity, but the greater part of this is confined to interior and finishing work. The brick market is now in fair shape, and the dealers are congratulating themselves that in all probability they will be able to fill all back orders by the end of the year and commence the new with a clean. year and commence the new with a clean docket. The congested condition of the railroads still interferes seriously with some lines of building, as lumber of al kinds is by no means plentiful, although the market is rather easier than formerly. Building hardware is in good demand, and dealers in this line look forward to and dealers in this line look forward to closing a year which will break all records in point of sales. Locks, hinges, wire, nails and screws are selling in enormous quantities and the demand shows but little sign of decreasing. Winter building is perhaps more active than luring any year in the city's history.

### Wholesalers Working Hard.

Wholesalers report the busiest Christmas in a number of years. The activity s not confined to any one line, but emn the city. Orders continue to come in tah, Nevada and Idaho in particular. Iany of these are received from the Many of these are received from the mallest and most inaccessible hamlets in the country. The well-nigh impassable the reads and winter weather n the country. The well-nigh impassable condition of the roads and winter weather denerally seemingly are without the lightest effect. Wholesale grocers are omewhat behind with their orders, but the working night and day to catch up ith good prospects of doing so before the lose of the holidays. In the dry goods ine jobbers are preparing their spring samples and report with only odds and ends of winter stocks on hand. There have been no material changes in prices, and while there is considerable delay at times in getting goods from the east, there is no very serious choracteristics. there is no very serious shortage in any

# Commission Market Good.

market is well stocked, and people are buying with a freedom and disregard of rices seldom or never equalled. Cali-ornia fruits of all kinds are plentiful at easonable prices, root vegetables of all inds are abundant, and Idaho and Ore-on apples and other fruit are coming in at a rate which disposes of all question of anything approaching a shortage for some time to come. Coast fish and shell fish have been rather scarce at times, due to poor transportation facilities and storms on the coast, but the market is well supplied at present with but little indication of a shortage between now and the first of the year.

past week or ten days. Skates in particular are in good demand, with the supply on hand hardly able to keep pace with it. The week's business in stoves and winter goods generally has been very large, toys of all kinds selling in enormous quantities. The boot and shoe trade is excellent and steady, notwithstanding the prevailing high prices. Closure. standing the prevailing high prices. Clothiers also report a good week, the demand for ready-made clothing being a feature of the sales. Everything from shirts to average to see the sales. hirts to overcoats seems to be include in the buying. Smoking jackets and bath-robes are in good demand, some especially attractive patterns being shown in the higher priced goods. Canes and umbrellas also contributed not a little to the week's

### Utah Stocks and Bonds.

The market for industrial and other tooks and bonds of the state is strong with but few sales, in anticipation of the coming dividends of January and the close of December. Prices are high, and close of December. Prices are high, and may be expected to go higher. The sugar season has been an excellent one, which has added to the confidence already reposed in all sugar stocks. A meeting of the board of directors of Walker Bros'. bank was held Friday, and the surplus ordered increased from \$75,000 to \$100,000. This action leaves the undivided profits of the concern at \$22.500. Following are the latest industrial stock

# CD SORES FED AND KEPT OPEN BY IMPURITIES IN THE BLOOD

Whenever a sore refuses to heal it is because the blood is not pure and healthy, as it should be, but is infected with poisonous germs or some old blood taint which has corrupted and polluted the circulation. Those most usually afflicted with old sores are persons who have reached or passed middle life. The vitality of the blood and strength of the system have naturally begun to decline, and the poisonous germs which have accumulated because of a sluggish and inactive condition of the system, or some hereditary taint which has hitherto been held in check, now force an outlet on the face, arms, Hawaiian song. legs or other part of the body. The place grows red and angry, festers and eats into the surrounding tissue until it becomes a chronic and stubborn uleer, fed and kept open by the impurities with which the blood is saturated. Nothing is more trying and disagreeable than a stubborn, non-healing sore. The very fact that it resists ordinary remedies and treatments is good reason for suspicion; the same germ-producing cancerous ulcers is back of every old sore, and especially is this true if the trouble is an inherited one. Washes, salves, nor indeed anything else, applied directly to the sore, can do any permanent good; neither will remov-

I was afflicted with a sore on my face of four years' standing. It was a small pimple at first but it gradually grew larger and worse in every way until I became alarmed about it and consulted several physicians. They all treated me but the sore continued to grow worse. I saw S. S. S. advertised and commenced its use and after taking it a while I was completely cured. My blood is now pure and healthy from the effect of S. S. S., and there has not been any sign of the sore since S. S. S. cured it.

The cure must come by a thorough cleansing of the blood. In S. S. S. will be found a remedy for sores and ulcers of every kind. It is an unequalled blood purifier—one that goes directly into the circulation and promptly cleanses it of all poisons and taints. It gets down to the very bottom of the trouble and forces out. the trouble and forces out every trace of impurity and makes a complete and lasting cure. S. S. S. changes the quality of the blood so that instead of feeding the diseased

parts with impurities, it nourishes the irritated, inflamed flesh with healthy blood. Then the sore begins to heal, new flesh is formed, all pain and inflammation leaves, the place scabs over, and when S. S. S. has purified the blood the sore is permanently cured. S. S. S. is for sale at all first class drug stores. Write for our special book on sores and ulcers and any other medical advice

you desire. We make no charge for the book or advice. THE SWIFT SPECIFIC CO., ATLANTA, GA.

Annual Report of the Juvenile Court Was Issued Yesterday by Judge Brown.

WANTS COUNCIL TO ACT

MANY CONTAMINATING INFLU-ENCES EXIST IN CITY.

Declaring that the purpose and mission of the juvenile court is to make safe the home, to save the children and to build up citizenship, Judge Willis Brown in his second annual report issued yesterday scores the practice of allowing those of immature years to frequent cheap theatres, public dance halls, saloons and pool rooms and asked the city council to legislate in such a manner that the work of the court may not be at least partially mullified by there contaminating influences.

### Court's Great Work.

"The greatest work of the juvenile court is in keeping children out of the courts," said Judge Brown, "and I contend that the successful juvenile court is the one that not only redeems the unfortunate and mistaken child, but deters others from making mistakes." In this connection he intimates that the court would be much more successful if some means could be devised to keep children away from contaminating influences as much as possible.

As Good as Any.

Regarding the work of the local court he says: "I can say without fear of suc-cessful contradiction that no other juve-nile court in existence can show greater beneficial results than can the Salt Lake juvenile court." In order to substantiate this statement Judge Beers and the Salt Lake beneficial results than can the Salt Lake juvenile court." In order to substantiate this statement Judge Brown shows by statistics that during the first seven and one-half months of the court's existence, between April 12 and Dec. 1, 1905, 296 juvenile delinquents came before it while during the twelve months from Dec. 1, 1905, to Dec. 1, 1906, the total was 257, an average of nineteen cases per month, as age of nineteen cases per month, as against an average of thirty-nine for the first period of the court's existence. Of this number it is interesting to note that during the first period only thirteen were girls and during the second only twenty-three. Petit larceny, profanity, use of to-bacco and truancy were the most common

> Adults Before Court. Adults to the number of fifty were

brought before the court the past year for contributing to delinquency. The maority of these cases were for selling liquor The work of the probation officers is highly commended in the report. Over 2,300 visits were made by them during the year to homes of probationers and so success ful have been their efforts that only 1 per cent of the delinquents have appeared in court for subsequent offenses. Judge Brown himself has taken a great deal of interest in the probation work and has personally visited many homes.

### Few Were Committed.

The judge reports that during the year only twenty-four boys and aine girls were committed to the state industrial school. During the period from April 12, 1965, to Dec. 1, 1995, there were twenty-five boys and three girls committed. This tarative decrease is explained by the before Judge Ritchie in the district court sciposed that the environment of children Dec. 21. Jones sued the Tribune for \$125.- 000 damages, alleging criminal libel. The suit was won by the Tribune.

Sciposed that the environment of children would be worse in a city the fact remains that Salt Lake, containing a population of cae-third of the entire state, sends only a third of the inmates of the industrial

Another feature of the report is a summary of the work of the physicians em-ployed by the court to examine defective children. A great work has been accom-plished along these lines, as it is often

skating rinks, theatres, public dances, saleon and pool rooms unless properly escorted.

Early choosing is advisable. for many of the things are such as we cannot replace now. Mehesy, the Furrier, Knutsford.

# WHAT MUST YOU DO FOR THE INEBRIATE?

You want to do what is best, of course, for his own sake and for the sake of his family.

It is not wise to upbraid him; his own conscience is doing that, besides you must remember that the man is diseased and that a symptom of his condition is an irresistible craving; he simply can't stop drinking; the stage when he could have done that is long What you should do is to advise him

to be cured of the disease and then the craving for drink will disappear; you should advise him to take the Keeley Cure. Why? First-Because it cures. It is now in

its twenty-seventh year and is, therefore, no experiment. It does the work. Second-It has gained public confidence and the people who control it re reputable business men. Third-Because in all cases where

health is at stake, only the best should be selected. It may, probably does. cost more, but in so important a matter one should not be "penny wise and ound foolish."

You may hear that other cures are just as good," "cheaper," etc., but remember we are the pioneers and all these other people unconsciously give us credit of being the standard comparing themselves with the

Be particular that he does take the Keeley Cure; some people think that every place where inebriety is treated is a Keeley establishment. This is not so, and this mistaken idea is a grave injury to us. There are thousands of people who have taken alleged 'cures" and the failures are wrongfully attributed to us, though such persons have never taken so much as one dose of our medicine. The right place is known by the name "The Keeley Institute," and there is one or more in nearly every state. All genuine Keeley Institutes obtain their remedies from our laboratory at Dwight, Illinois, If you prefer to send a patient to some other establishment, that is your right; we are unwilling, however, that the blame which attaches to their failure should be placed upon us and it is unjust that it should be.

### Do We Always Succeed?

That is a proper question and one thich we will frankly answer. In all eases taking a full course of our treatment and where our instructions are followed, a cure is effected. But you say, "I know some people who took the Keeley Cure and who now drink.' True, but these persons will in all cases tell you that the return to drink was not due to a failure of the cure, but to extraneous causes. Some people will insist on playing with edged tools ome prefer a drinking life to a sober ne, strange as it may seem; some disegard the rules of common sense. For nstance, the Keeley cured man who smokes cigarettes relapses. If he tries to be a moderate drinker, he will fail nd soon be as badly off as ever. The Keeley Cure will enable a man to be a total abstainer, but cannot be expected o change a drunkard into a moderate drinker. If a man persists in seeking ow company and evil associates he will soon relapse, and he might as well. If a man is to be as bad sober as he is drunk, there is little advantage in sobriety. The so-called failures of the Keeley Cure are only failures of the men. There is no question about it. Every man who takes the Keeley Cure properly is cured of the craving for drink and, if he chooses, can and will remain sober as long as he lives. At least 80 per cent remain sober. Is not that a good record? Compare it with hospital statistics of any kind and you will see we stand at the head.-Keeley Institute, 334 West South Temple.
